Education

Hong Kong Metropolitan University | Bsc In Computer Science

Graduated: July 2026 | CGPA: 3.33/4.0

Relevant Courses: Software Engineering, Database Systems, Web Programming, Android App Development

Technical Skills

Programming Languages: Java, JavaScript, HTML, CSS, React Native, Node.js

Frameworks/Platforms: Spring Boot, Expo, Apache Cordova, Node.js, JSP, H2 Database, MySQL

Tools: Git, Docker, IntelliJ IDEA, VS Code, Claude Code

Projects

LockMatch: Gamified MBTI Social Matching Platform (Final Year Project) |

github.com/LEWCHUNHONG/LockMatch

- **UI/UX Leadership:** Designed an intuitive interface tailored for Gen Z, achieving an excellent System Usability Scale (SUS) score of 82.4.
- **LBS Development:** Implemented Location-Based Services (LBS) utilizing the Haversine formula to enable precise 1km-range proximity matching.
- **Core Feature Engineering:** Developed responsive real-time location updates and a "60-second instant chat invitation" module to enhance user engagement.
- **Full-Stack Integration:** Integrated AI-matching and gamification modules across a stack of React Native, Node.js, and MySQL.

HKETA – Hong Kong Transport ETA App (Group Project Lead) | github.com/shamough1792/HKETA

- Spearheaded the full-stack development and architecture of the mobile application.
- Independently engineered core features including real-time bus arrival tracking and dynamic route planning by integrating government open APIs.

Online Course Platform | github.com/shamough1792/CourseWeb

- Led the full-stack development of a web application featuring secure user authentication and course management systems.
- Leveraged Spring MVC with JSP for dynamic front-end rendering and utilized H2 as the embedded database for efficient data persistence.
